Energy Union will also help Europe speak with a single voice on global energy matters. Energy Union builds on existing EU energy policy, including the 2030 Energy and Climate Framework and the Energy Security Strategy. EU energy targets. The EU has set itself energy and climate targets for 2020, 2030 and 2050. Targets for 2020:

[Energy Tax and Regulatory Policy in Europe | The MIT Press](#)

The European Union (EU) faces critical challenges in energy policy making, the most pressing of which are how to achieve the deep greenhouse gas reductions promised at the December 2015 UN Conference of the Parties in Paris, and how this effort can be coordinated with already existing policies. Energy policy is primarily a member state responsibility, and policy makers need an overarching view of the main issues in energy policy and their interaction with environmental policies.
